

2024 Medical Assisting Educator Compensation and Benefits Report

Of survey respondents who identified primarily as medical assisting educators, about 86% of medical assisting educators surveyed work full time, with the other 14% teaching part time. The majority (72%) of full-time educators receive their compensation in the form of an annual salary, while around 28% are paid hourly.

Compensation

On average, full-time medical assisting educators reported earning an annual gross salary of \$52,740, with almost 40% reporting that they earn at least \$65,000 annually and about 20% reporting more than \$75,000 in annual earnings. The breakdown of educators' salaries by years of experience is shown in Table 5.

Employment Benefits

Insurance

About 71% of full-time educators receive major medical coverage and 63% receive dental insurance. Accidental death, disability, discount prescription, basic hospitalization, and vision were over 50% rates. Rates of coverage for full-time educators are listed in Figure 5.

AAMA Membership and Conference

When asked whether employers offer to help pay for various AAMA expenses, 42% of full-time educators who are AAMA members reported full payment of membership dues, with 45% reporting full payment of conference registration fees. Roughly 44% reported full payment of travel and lodging for the AAMA Annual Conference (Figure 6).

Table 5. Average full-time educator salary by years of experience (\$)

Experience	Salary
0–2 years	48,315
3–5 years	44,367
6–9 years	46,516
10–15 years	62,013
16+ years	67,123
Overall	52,740
