

2022 Medical Assisting Educator Compensation and Benefits Report

Of survey respondents who identified primarily as medical assisting educators, about 88% of medical assisting educators surveyed work full time, with the other 12% teaching part time. The majority (66%) of full-time educators receive their compensation in the form of an annual salary, while around 34% are paid hourly.

Compensation

On average, full-time medical assisting educators reported earning an annual gross salary of \$50,789, with nearly 33% reporting that they earn at least \$65,000 annually and 13% reporting more than \$75,000 in annual earnings. The breakdown of educators' salaries by years of experience is shown in Table 5.

Employment Benefits

Insurance

About 71% of full-time educators receive major medical coverage, and 61% receive dental insurance. Accidental death, disability, basic hospitalization, and vision were over 50% rates. Rates of coverage for full-time educators are listed in Figure 5.

AAMA Membership and Conference

When asked whether employers offer to help pay for various AAMA expenses, 38% of full-time educators who are AAMA members reported full payment of membership dues, with 44% reporting full payment of conference registration fees. Roughly 42% reported full payment of travel and lodging for conference (Figure 6).

Table 5. Average full-time educator salary by years of experience (\$)

| Experience | Salary |
|-------------|--------|
| 0–2 years | 41,337 |
| 3–5 years | 47,004 |
| 6–9 years | 50,016 |
| 10–15 years | 58,557 |
| 16+ years | 61,865 |
| Overall | 50,789 |
